Chapter 5 Exercise

The first app for truck drivers is Trucker Path. This free app, available for iOS and Android, has many useful features. It provides locations of 500,000+ truck stops across the U.S. and Canada. It also has GPS navigation specifically for your truck size and avoids routes that aren't suitable for the vehicle. It also provides fuel discounts, parking availability, weigh station location and availability, and a trip planner.

Another app is Trucker Tools. This app is free and available on iOS and Android. It allows truckers to find and book loads with their favorite brokers as well as track loads. Other features include a trip planner, truck stop guide, routing and fuel optimizer, weigh scales, truck washes, rest areas, and medical care.

Weigh My Truck is a free app for iOS and Android. It automatically locates which CAT Scale a trucker is using and allows users to pay for it through the app. Your account stores truck and trailer information and keeps track of past weighs, which can be exported to PDF.
